Resumo

Software Engineering Specialist with 10+ years of experience delivering high-impact, scalable, and mission-critical systems. Proven track record as a technical leader in companies such as Cielo, Pluxee Brasil, and BTG Pactual, driving architecture decisions, accelerating delivery, and modernizing legacy platforms at scale. Specialist in backend engineering and distributed systems, with deep expertise in Golang, Java, Kotlin, and Spring Boot, building resilient microservices and high-performance APIs in cloud-native environments on AWS (Lambda, EC2, RDS, S3, CloudFormation, SQS). Strong ownership mindset, acting end-to-end — from system design and architecture to production and scaling — consistently improving performance, reliability, and developer productivity. Experienced in leading teams and mentoring engineers, while also being hands-on in critical technical decisions, migrations (Java 7 → 21), and legacy system refactoring. Advanced knowledge in event-driven architectures and messaging systems (Kafka, RabbitMQ), along with solid experience in relational and NoSQL databases (PostgreSQL, Oracle, MongoDB, DynamoDB, Redis, ElasticSearch). # Power user of AI-assisted development, leveraging tools like Codex and generative AI to speed up delivery, automate repetitive tasks, and elevate code quality — consistently outperforming traditional development workflows. Comfortable in fast-paced environments, applying Agile (Scrum, XP) and DevOps practices (Docker, Jenkins, OpenShift) to ensure continuous delivery and operational excellence. Focused on remote-first opportunities, delivering results with autonomy, ownership, and strong communication.

Experiência

Stefanini LATAM

Software Engineer - Itaú

maio de 2026 - Present (5 meses)

Brasil

- Development and maintenance of distributed and mission-critical applications
- Participation in agile ceremonies, including bi-weekly planning and daily stand-ups
- Monitoring and supporting production applications to ensure stability and performance
- Application of engineering best practices (SOLID, Design Patterns, Hexagonal Architecture)
- Building solutions based on microservices and cloud computing
- Implementation of DevOps pipelines and practices with a focus on automation and observability
- Backend development using Java (Spring Boot) and Go
- Dependency management and modularization with Maven / Multi-Module Maven
- Infrastructure provisioning as code using Terraform (IaC)
- Integration with AWS services: ECS, EC2, S3, SNS, SQS, API Gateway, Lambda, RDS, Aurora, DynamoDB
- Implementation of authentication and security mechanisms: OAuth, JWT

Tech Leads club

Membro da TechLeads.club

abril de 2026 - Present (6 meses)

Tech Leads Club is a community focused on advanced content about software development, career, technical leadership, and management.

The goal is to elevate the Brazilian community beyond the senior level through the collaborative sharing and creation of content, focused on advanced day-to-day topics based on real-world experiences.

DragonKi

Idealizador

janeiro de 2026 - Present (9 meses)

- Experience in backend development using Golang
- Experience with PostgreSQL and relational data modeling
- Experience with Redis for asynchronous processing and background jobs
- Experience with Docker and containerized local/deployment environments
- Experience with Hexagonal Architecture and layered backend design
- Experience with GORM for ORM and repository implementations
- Experience with SQL migrations using Golang Migrate
- Experience with pgx and PostgreSQL drivers in Go

- Experience with Telegram Bot API integrations
- Experience with webhook-based integrations
- Experience with Mercado Pago API integration
- Experience with Asynq for distributed background job processing
- Experience with cron/scheduled jobs for recurring workflows
- Experience with feature flags persisted in database
- Experience with integration testing against real PostgreSQL and Redis
- Experience with idempotent payment and reward processing flows
- Experience with observability endpoints, metrics, and pprof diagnostics
- Experience with environment-based configuration for multi-service applications
- Experience building bot, worker, webhook, migration, and seed services in Go

Compass UOL

7 meses

Integration Architect - Vivo Project

novembro de 2025 - abril de 2026 (6 meses)

- PLANNING AND ESTIMATION – Engage in macro estimation (T-Shirt sizing) through Sprint 0/Grooming
- GOVERNANCE AND ARCHITECTURE – Ensure architecture governance aligned with corporate guidelines
- MANAGEMENT AND VISIBILITY – Record and track activities in Jira, attach deliverables, flag impediments
- QUALITY AND SUPPORT – Participate in validations and war rooms to ensure delivery quality
- TECHNICAL DOCUMENTATION – Create technical input for development tickets

Software Engineer - PicPay Project

outubro de 2025 - novembro de 2025 (2 meses)

- - Experience in development using Kotlin
- - Experience with Postgress
- - Experience in development using AWS (SQS, SNS, ...)
- - Experience with Docker, Docker Compose and Kubernetes
- - Experience with Argo, Vault
- - Experience with Hexagonal Architecture

Cielo

Software Engineering Specialist

setembro de 2024 - agosto de 2025 (1 ano)

As a Specialist II, I served as a Technical Lead, leading a multidisciplinary team of backend, front-end, Android, iOS, and QA professionals. I was deeply involved in product definition and evolution, working closely with both technical and business areas to ensure the delivery of innovative and efficient solutions. In addition to coordinating the team's activities and mentoring the technical development of team members, I was also responsible for production deliveries, ensuring that processes ran smoothly, on time, and with high quality. Furthermore, I actively contributed to the development and migration of APIs, focusing on upgrading Java versions from 7 to 21 and restructuring legacy applications within the self-service project.

Pluxee Brasil

Software Specialist

dezembro de 2023 - agosto de 2024 (9 meses)

Brasil

- - Experience in process optimization/migration
- - Experience in defining architecture and project structure
- - Experience in development using Spring
- - Experience with Oracle / Postgress
- - Experience in development using AWS (Lambda Function, RDS, EC2, ...)

ECSA

Co-Founder and Chief Technology Officer

abril de 2022 - novembro de 2023 (1 ano 8 meses)

Santa Catarina, Brasil

- Experience in Development team coordination
- Experience in Construction of projects from scratch
- Experience in defining architecture and project structure
- Experience in development using Golang
- Experience in development using Kotlin

Saks

Tech Lead

dezembro de 2020 - março de 2022 (1 ano 4 meses)

Santa Catarina, Brasil

- Experience in Development team coordination
- Experience in Restructuring legacy projects
- Experience in development using Golang
- Experience in development using Kotlin

- Experience in development using Spring

BEYOND Soluções

Senior Software Engineer - Allocated in the Digital Bank project - BTG
agosto de 2020 - janeiro de 2021 (6 meses)

São Paulo, Brasil

-- Project Membership

- Experience in development using Kotlin
- Experience in development using Clean Architecture
- Experience in development using Apache Kafka
- Experience in development using AWS (SQS, CloudFormation, ...)
- Experience development with swagger

zFlow

Senior Software Engineer

dezembro de 2019 - agosto de 2020 (9 meses)

São Paulo Area, Brazil

-- Project Credline (Itaú)

- Experience in developing RESTful applications using Java 8, Dropwizard, Micronaut, Spring Boot.
- Experience with Mongo DB, ElasticSearch.
- Experience with Docker.
- Experience with Swagger.
- Experience with AWS.

Santander Brasil

System Analyst

setembro de 2018 - novembro de 2019 (1 ano 3 meses)

São Paulo, São Paulo

-- Project SPB

- Experience with agile Scrum methods.
- Experience in developing batch processing jobs.
- Experience in developing RESTful applications using Java 8, Spring Boot.
- Experience with maintaining legacy applications using Java 6 and 7.
- Experience with cloud services on OpenShift.
- Experience with CI tools like Jenkins.
- Experience with WebSphere messaging solutions.

- Experience with Oracle relational database

BRQ

Senior System Analyst

outubro de 2017 - setembro de 2018 (1 ano)

São Paulo e Região, Brasil

-- Project SPB (Santander)

- Experience with agile Scrum methods
- Experience in developing batch processing jobs
- Experience in developing RESTful applications using Java 8, Spring Boot.
- Experience with maintaining legacy applications using Java 6 and 7
- Experience with cloud services on OpenShift.
- Experience with CI Tools like Jenkins.
- Experience with WebSphere messaging solutions
- Experience with Oracle relational databases

Affero Lab

4 anos 9 meses

System Analyst

janeiro de 2014 - setembro de 2017 (3 anos 9 meses)

Juiz de Fora e Região, Brasil

- Experience with Scrum and XP agile methodology
- Experience in developing SPAs using Webpack, Grunt, AngularJS, jQuery
- Experience in developing RESTful applications using Java 8, Node.js, Spring Boot, Express
- Experience in developing integrations between systems using Spring Integration
- Experience in developing batch processing jobs using Spring Batch
- Experience with maintaining legacy applications using Java 7, JavaEE, Struts
- Experience with HornetQ (JMS) and RabbitMQ (AMQP) messaging solutions
- Experience with relational/non-relational databases SQL Server, DynamoDB, Redis, Elasticsearch
- Experience with AWS (ELB, EC2, S3, CloudFront, Cloud Watch)
- Experience with ELK stack and New Relic (monitoring and profiling)

BPO

janeiro de 2013 - janeiro de 2014 (1 ano 1 mês)

- Customer training and qualification
- Validate delivery quality

- Identify potential business
- Execute procedures not possible through administrative tools (SQL Server)
- Prepare training materials
- Carry out test script
- Ensuring customer satisfaction

Santa Casa de Misericórdia de Juiz de Fora/MG

System Analyst

outubro de 2012 - dezembro de 2012 (3 meses)

- Support to the MV Health Management system
- User training
- Development of internal systems (JAVA)
- Creating custom reports (PL/SQL)

Solucionar Informática & Sistemas

Developer

agosto de 2011 - agosto de 2012 (1 ano 1 mês)

- Corrective maintenance;
- Evolutionary maintenance;
- Database maintenance;
- Creation of delivery packages;
- Testing assistance (unit testing and regression);
- Stress environment configuration;
- Configuration of development environment in the clouds.

Associação dos Subtenentes e Sargentos do Exército de Juiz de Fora

Information Technology Consultant

julho de 2011 - agosto de 2011 (2 meses)

- Consultancy on the implementation of the member control system;
- Test of system functionalities;
- Assistance in the migration and training of employees.

Caixa Econômica Federal

System Analyst

outubro de 2010 - agosto de 2011 (11 meses)

- Requirements gathering;
- Data maintenance in SQL Server;
- Development of a results demonstration system;
- Creation of tools in Visual Basic (Macros) to obtain data in legacy system.

eMiolo.com Solucoes Internet Ltda.

Developer

maio de 2010 - outubro de 2010 (6 meses)

- System customization;
- Customer support;
- Creation of base;
- Corrective maintenance;
- Requirements gathering;
- Evolutionary maintenance.
